

CGTP-IN conveys its solidarity to the people and workers of Syria

The CGTP-IN conveys its solidarity with the people and workers of Syria. Today there is a repetition of what was already evident in Libya and in Iraq, with the use of lies and massive disinformation campaigns.

What we see are new accusations, never proved, of the utilisation by the Syrian government of chemical weapons. A pretext which had already previously been used to invade Iraq and that was later proved to be false.

Lies are a factor to evaluate the USA government pretext to martyrize the Syrian people.

Using all these pretexts, we see again a US government decision, this time by President Trump, of attacking a sovereign state and raise the military escalate against the Syrian people.

This attack violates international law and disrespects the UN Charter.

This new aggression on Syria is not disconnected from the strategy of domination of the USA and its allies in the Middle East and in the Arab world. Big capital and its representatives seek to increase their domination and control of the region, in order to control the access to oil, water and natural resources.

The wars against the peoples of Iraq, Afghanistan, Libya and now Syria and the threats against Iran, have the major goal of ensuring that their main ally in the region, Israel, continues with impunity the occupation of Palestine and the martyrdom of the heroic Palestinian people.

The CGTP-IN condemns this attack against Syria and the war of aggression to which it is subject.

For the CGTP-IN, the respect for the right of the Syrian people to their sovereignty, independence and territorial integrity is essential to secure peace in that part of the world. We want to make it clear that we will continue to convey our solidarity to the Syrian workers and people.
